LEARN THE INS AND OUTS OF CLINICAL RESEARCH

Many clinicians are consumers of research when reading the literature to stay up-to-date. But to really understand research, you have to conduct it yourself. At least once.

VU Amsterdam is the first university in The Netherlands (and probably the world) to offer a dedicated scientific Master’s programme in clinical experimental research in musculoskeletal physiotherapy. It is an excellent stepping stone to a successful clinical or research career.

WHY STUDY AT VU AMSTERDAM?
- Unique focus on clinical experimental research
- Integrated, multidisciplinary approach
- Hands-on experience with scientific research
- Informal atmosphere and personal attention.

YOUR FUTURE CAREER
With a Master’s degree in Musculoskeletal Physiotherapy Sciences a large and varied range of career opportunities awaits. The acquired scientific perspective and training makes you competitive for (more senior and leadership) positions in academic and primary, secondary or tertiary healthcare facilities. This holds for clinical positions as well as management or policy-making positions in physiotherapy. In addition, you are well prepared to start an academic or commercial research career, or a teaching career at a vocational institute.

ADMISSION REQUIREMENTS
To gain admission to the Master’s programme Musculoskeletal Physiotherapy Sciences, you need a Bachelor’s degree in a relevant field and basic skills in Methodology, Mathematics and Physics. Please consult our website to find out whether you can be admitted directly, or whether a preparatory program is required to address potential deficiencies. Foreign students may have to take a language proficiency test.

LANGUAGE: ENGLISH
DURATION: 1 YEAR/FULL TIME
APPLICATION DEADLINE: DUTCH STUDENTS: JUNE 1, FOREIGN STUDENTS: APRIL 1 OR JUNE 1 (CONSULT WEBSITE)
